PROFILE

Software engineer with 15 years delivering web and mobile products, with a focus on React and TypeScript and backend experience in Node.js and Java. Delivered enterprise Azure DevOps extensions, multi-brand products at LeoVegas, and shared healthcare components at Philips. Experience spans performance and permissions, application architecture, production monitoring, and mentoring engineers.

CORE SKILLS

Frontend: React, TypeScript, JavaScript, Next.js, React Native, Redux, TanStack Query

Backend & Data: Node.js, NestJS, REST, GraphQL, Java, PostgreSQL, MongoDB, Oracle

Delivery & Quality: Azure DevOps, Azure Pipelines, Docker, Playwright, Jest, React Testing Library, Application Insights, KQL

AI-assisted development: Claude Code, Codex, GitHub Copilot

Currently learning: Python (FastAPI), Rust and Go through personal projects

EXPERIENCE

Nooga Solutions AB | Stockholm, Sweden

Software Engineer | Aug 2025 - Oct 2026

- Built React and TypeScript extensions sold to enterprise customers through the Azure Marketplace.
- Improved dashboard responsiveness for large customer organisations through batched data loading, bounded request concurrency and retries, keeping the interface usable during large loads.
- Designed and delivered permission controls covering four user roles, including additional rules for project managers and extension owners.
- Owned security checks and automated testing; used Application Insights to monitor performance and investigate production issues.
- Maintained backend services supporting licence checks and risk features, alongside customer-facing extension development.
- Worked with Product and Sales to prototype ideas and assess customer usage before committing to implementation.

LeoVegas Group | Stockholm, Sweden

JavaScript Engineer | Apr 2021 - Apr 2025

- Built customer-facing features on a regulated, multi-brand platform serving hundreds of thousands of players; contributed to new brand and market launches.
- Ran multiple A/B tests with the experimentation team, including a winning signup design that increased signups.
- Delivered web features embedded in Ionic and early React Native apps, collaborating with native engineers on iOS and Android behaviour.
- Contributed to the shared group API, bringing multiple backend facade services together through GraphQL.
- Investigated production issues using Datadog and supported release quality through automated testing and code review in a regulated, responsible-gaming environment.

Dot Digital Group | Florianopolis, Brazil

Analyst Developer | Jan 2021 - Mar 2021

- Built Swift and React Native features for a mobile micro-learning platform.

EXPERIENCE (CONTINUED)

CDA/WEDEV | Balneario Camboriu, Brazil

Software Architect | Apr 2018 - Jan 2021

- Led React Native application delivery from architecture and design through App Store release.
- Built live audio/video calling with OpenTok, managing sessions and streams across iOS and Android.
- Led requirements workshops with customers and leadership, designed web and mobile architectures, mentored developers and interviewed candidates.

Philips Informatics | Blumenau, Brazil

Systems Architect | Apr 2017 - Apr 2018

- Developed shared AngularJS framework components for Philips Tasy EMR as part of the core architecture team, supporting around 250 internal developers across product modules.
- Built patient-test graphing components and maintained Java services for clinical workflows.

Pointer-Cielo | Passo Fundo, Brazil

Full-stack Web Developer | Jun 2015 - Feb 2017

- Owned the architecture of a live vehicle-tracking prototype: Oracle-to-MongoDB ETL, a Java polling service and WebSocket updates.
- Kept Oracle as the system of record while using MongoDB and application-level polling to avoid Oracle real-time licensing costs.

Earlier Experience | Passo Fundo, Brazil

Java and PHP web development | Mar 2011 - Apr 2015

- Co-founded Ativsoft Web Systems, a PHP consultancy; developed Java point-of-sale software at São João Pharmacies, PHP e-commerce and payment integrations at DBSite, and Java business intelligence systems at Compasso Tecnologia.

SELECTED PERSONAL PROJECTS

Grip | React/Expo and Python/FastAPI

Hiring-pipeline and interview-prep application with an LLM grader that accepts feedback only when grounded in a verbatim source quote. Python/FastAPI is self-directed project experience.

github.com/Inn-Keeper/grip-apps

Intygy | Playwright and axe-core

Pull-request accessibility gate that baselines existing findings so only newly introduced WCAG 2.2 regressions block a merge.

github.com/Inn-Keeper/intygy

Lambari | Go, Kafka and React - learning prototype

Payment-fraud scoring prototype combining velocity analysis with an analyst case queue, SSE updates and throughput benchmarks.

github.com/Inn-Keeper/lambari

EDUCATION & LANGUAGES

Associate Degree, Systems for Internet | University of Passo Fundo, Brazil | 2010 - 2014

English: Fluent | Portuguese: Native | Swedish: B1 (reading and writing) | Spanish: Reading comprehension
