# DALTON MORAES DE CASTRO

**Senior Full-stack Engineer - TypeScript, Node.js, React, and regulated platforms**

Stockholm, Sweden | +46 73 576 0864
daltonmcastro@gmail.com | LinkedIn | GitHub | Portfolio

## PROFILE

Senior full-stack engineer with 15 years delivering web and mobile products, from architecture through production. Works in TypeScript across React front ends and Node.js/NestJS services, with JVM roots. Shaped by regulated healthcare (Philips Tasy EMR) and iGaming (LeoVegas) products. Experienced in platform work, observability, testing, and release workflows.

## SKILLS

- **Backend & APIs:** Node.js, NestJS, GraphQL/Relay, REST/OpenAPI, Java, Spring Boot, Kafka, microservices
- **Currently learning:** Go, Python (FastAPI) - through the personal projects below
- **Data:** PostgreSQL, MySQL, SQLite, Supabase, MongoDB, Oracle
- **Frontend:** React, TypeScript, JavaScript, Next.js, React Native, Redux, TanStack, Material UI, Tailwind, Vite
- **Cloud & Delivery:** Azure DevOps, Azure Pipelines, Azure Functions, Supabase Edge Functions, GCP, Terraform, Git, Docker
- **Quality & Observability:** Playwright, Jest, React Testing Library, Application Insights, KQL, Datadog, Grafana, LaunchDarkly
- **AI:** Claude Code, Codex, Cursor, GitHub Copilot, Anthropic API, Gemini, FastAPI LLM services, RAG, spec-driven development, agent loops, custom skills and plugins

## EXPERIENCE

### Nooga Solutions AB - Stockholm, Sweden | Aug 2025 - Present

**Software Engineer**

- Build React and TypeScript extensions for Azure DevOps, sold to enterprise customers through the Azure Marketplace.
- Sped up a planning dashboard's load times from several minutes to milliseconds by improving how data loads and is processed.
- Designed and rolled out permission controls for a new product, covering four user roles plus extra cases for project managers and extension owners.
- Worked with Product and Sales on early prototypes using customer usage data to test ideas before building them out.
- Own security checks and automated testing for the product, and monitor performance to catch and fix issues early.
- Fixed and improved backend services behind the license checker and risk features.

### LeoVegas Group - Stockholm, Sweden | Apr 2021 - Apr 2025

**JavaScript Engineer**

- Built customer-facing features for LeoVegas.com, a regulated platform used by hundreds of thousands of players across multiple brands.
- Shipped web features that ran embedded inside the LeoVegas Ionic casino and sports app and an early-stage React Native app, making sure they worked on iOS and Android.
- Helped launch new brands and expand into new markets on the shared LeoVegas.com platform.
- Contributed to early shared backend services used across the company's products.
- Helped build an early version of an internal tool meant to bring several company tools into one place.
- Helped keep the product running smoothly through monitoring, testing, and code review, while following strict compliance and responsible-gaming rules.
- Ran A/B tests with the experimentation team; one winning design significantly increased signups after testing.

### Dot Digital Group - Florianopolis, Brazil | Jan 2021 - Mar 2021

**Analyst Developer**

- Built mobile features with Swift and React Native for a micro-learning platform.

### CDA/WEDEV - Balneario Camboriu, Brazil | Apr 2018 - Jan 2021

**Software Architect**

- Led React Native delivery from architecture and design through App Store release.
- Built a live video and audio calling feature on OpenTok, covering session and stream management across iOS and Android.
- Designed web and mobile application architectures spanning UX and backend work.
- Led customer and leadership requirements workshops to scope projects, while mentoring developers and interviewing candidates.

### Philips Informatics - Blumenau, Brazil | Apr 2017 - Apr 2018

**Systems Architect**

- Built the proprietary AngularJS framework behind Philips Tasy EMR, an electronic medical record product used worldwide, as part of the core architecture team.
- Improved shared framework components used by around 250 internal developers across every product module.
- Built patient-test graphing components and maintained Java services for clinical workflows.

### Pointer-Cielo - Passo Fundo, Brazil | Jun 2015 - Feb 2017

**Full-stack Web Developer**

- Owned the architecture for a vehicle-tracking monitoring prototype: Oracle-to-MongoDB ETL and a Java polling service that pushed live updates over WebSockets.
- Avoided Oracle real-time licensing costs by keeping it as the system of record and using MongoDB plus application-level polling; also built Java and Oracle data-mining solutions.

### Earlier roles - Passo Fundo, Brazil | Mar 2011 - Apr 2015

**Java and PHP web development**

- Ativsoft Web Systems (co-founder, PHP consultancy), Sao Joao Pharmacies (Java point-of-sale system for a national chain), DBSite (PHP e-commerce with payment gateways), and Compasso Tecnologia (Java BI systems for enterprise clients).

## PERSONAL PROJECTS

- **Grip** - Hiring-pipeline and interview-prep platform with Vite/React web and Expo mobile applications, plus a Python/FastAPI LLM grader (Gemini) that accepts feedback only when it is grounded in a verbatim source quote. | grip-platform-web.vercel.app | github.com/Inn-Keeper/grip-apps
- **Intygy** - Pull-request accessibility gate that baselines Playwright and axe-core findings, so only newly introduced WCAG 2.2 regressions block a merge. | github.com/Inn-Keeper/intygy
- **Lambari** - Learning prototype: real-time payment-fraud scoring engine combining Go and Kafka velocity analysis with a React analyst case queue. Includes sharded velocity windows, SSE updates, and throughput benchmarks. | github.com/Inn-Keeper/lambari

## LANGUAGES

English: Fluent | Portuguese: Native | Swedish: B1 (reading and writing) | Spanish: Reading comprehension

## EDUCATION

Associate Degree, Systems for Internet - University of Passo Fundo, Brazil | 2010 - 2014 | Coursework included C#, ASP.NET, C++, JavaScript, PHP, Java web, and Android
